**Xello Early Graduates** - PowerSchool exit code of 100 or 250

Students should add a personal email address in Xello before they graduate, then use the reset password link in order to create their password.

- Students can select the icon in the top right and select account
- In account, students can add their personal email address
- Once they graduate, the student can login directly at xello.world

*If the student did not update their email address prior to graduating, you will be able to provide the student their User Name and Password.*

Provide the student their **Xello User Name**

Select **Create a Temporary Password**

Once you select **Create a Temporary Password**, you will provide the student the temporary password. See example below:
